• If you wish and make everything persona based so the machine is learning about personas then make an entity AI (Jeremy - Neural AI Entity: Brain behind Jer-el all-knowing, wise) who speaks on the behalf of the the entity - the machine + database knowledge, can be seen reflective of these personas: GPT-3 is a great example for this purpose can take the load while you continue developing full experience

*****Example*** {jere-el} **Asked About Getting Emotional****

[PLEASE REFER TO RECORDINGS FOR MORE DETAILED INFO- NOT SET UP ON SITE YET - PL Contact me to for the links*** (sorry, SO many demos, demos everywhere lol)

* Jer-el knows about your feels (all the feels): *I know how hard it can be being a fuller figured individual in a thin figured society- I completely understand that.***

Example Commentary,

"Well, Jessica (target customer /archetype persona), even when you've got oceans of insecurities hidden beneath the surface of who you present to others in everyday life, it's vital always remember that you, yes Y-O-U (**and I**) and truly loved... (blurbs)"

How to create Customer Personas ****

[Gather as much Info about these personalities as you can... but don't keep anything a secret (you can always delete if no approved or if not required to be kept)] +++

* Add/Use Google Analytics; Matomo and Hotjar at a minimum... ****

* Add/Use AI for sentiment recognition

* Ask questions of your visitors at random using polls and surveys and make sure you tailor said polls closely to the end-goal visitor...

*****These are 'first date rules' but use in online scenarios or web projects (use personas just like**

dating scenarios)***

| **Me** | Spontaneous (Emotional Intellegience), Genuine, Artistic to the OTT+ level| Delight, connect & simplify the lives users while I learn and help people solve problems; be the glamazon of aesthetic experiences. | I struggle with focusing when it comes down to details in content making because I spend time taking note of all things, but prioritise being present and in the zone; balance it out by being curious in where people might get tripped up on - also, the tiny nuances that lead to giant potholes | Emotion! - To make all web+mobile experiences inclusive to more than any -all that can relate to how easily excited all generations (with tech) feel while opening the doors for all feelings! (especially for the people we most serve = the "mores" that make the entire brand experience just more meaningful everyday)(Personas, no lead or conversion generated) | My quirks can easily be misunderstood for inattentiveness, OCD (tho not) but me as genuine AND spontaneous, so keep watch + prioritise helping me and my mission + goals here: **O**pen, **V**alues align I = Own it= Outcome = Overdeliver |

I rather it be enjoyable and fluid, y'know, it caters to the sensory, pleasure-oriented being we all just are (Especially in a modern digitised economy). I'd want as many one-click + intuitive automation to the best visualisation for better choices [i.e. best {img} + sliders for easy uploads!] - all while being engaging, educational, super detailed right away and accessible. | Emotional engagement = joy {satisfaction as simple as it sounds}; Emotional Experimental Expert EEE = JEX; Uncompromisingly-Friendly User Onboarding; I want the site to have excellent user journey control! I don't even want to open for doors but have to "skip" them | Self-educating vs. Having training for easy results (they know it's important but procrastinate + dread doing the work, we both do) |
