Introduction

Oasis Poker (sometimes incorrectly referred to as Caribbean Stud Poker or Caribbean Poker, which is a different game) is a 1 casino poker game, meaning that it's derived from classic player vs player poker, but instead the player plays against the 1 house. Oasis Poker is a derivative of Caribbean Stud Poker that allows the player to discard undesirable cards to receive 1 a replacement. Oasis Poker is played with a standard 52 card deck.

We are aware of Oasis Poker being offered at 1 Net Entertainment, Betsoft, GameSys and Galewind casinos.

Play Structure

Initially the player places an 'Ante' wager and the dealer will deal out 1 5 cards to the player and themselves. All but one of the dealers cards are dealt face down (often referred 1 to as 'Hole' cards). The player then has to make the decision to either Fold their hand – losing their 1 Ante wager – discard up to 5 cards or 'Call'. Where the player chooses to discard cards they will be 1 charged a fee equal to the Ante bet for each card they exchange. This fee is not a bet and 1 will not be returned regardless of the outcome of the hand. If the player chooses to Call – either before 1 or after discarding cards - they have to place a bet twice the size of the Ante wager then the 1 dealer's hole cards are revealed and the hands are compared.

Hand Comparison

Oasis Poker ranks hands according to a hierarchy common to 1 poker games which is explained below (strongest to weakest);

- * Royal Flush – The Ace, King, Queen, Jack and Ten cards 1 all of the same suit.
- * Straight Flush – five numerically adjacent cards of the same suit (Example – 4, 5, 1 6, 7 and 8 of Diamonds). Where both the player and dealer hold a Straight Flush the hand with the 1 highest card is considered the winner.
- * 4 of a Kind – four cards of matching rank (Example - 7 of 1 Hearts, Clubs, Diamonds and Spades). Where both the player and the dealer hold 4 of a Kind the hand with 1 the higher rank is considered the winner.
- * Full House – three cards of the same rank and two cards of 1 a different but matching rank (Example – 8 of Hearts, Clubs and Diamonds and Jack of Spades and Hearts). Where 1 both the player and dealer hold a Full House, the hand with the higher rank 3 of a Kind is 1 considered the winner.
- * Flush – five cards of the same suit (Example – Ace, 8, 5, 2 and Queen of 1 Spades). Where both

the player and dealer hold a Flush the hand with the highest card is considered the winner. 1 Where the highest card is matched the second highest is considered and so on.

* Straight – five numerically adjacent cards 1 ignoring suit (Example – 7 of Spades, 8 of Spades, 9 of Clubs, 10 of Diamonds and Jack of Diamonds). 1 Where both the player and dealer hold a Straight the hand with the highest card is considered the winner.

* 3 of a Kind – three cards of the same rank with 2 unmatched cards (Example – 9 of Spades, Clubs 1 and Hearts with any two other cards that are not the 9 of Diamonds or a matching pair). Where both 1 the player and dealer hold a 3 of a Kind, the hand with the higher ranked 3 of a Kind 1 is considered the winner.

* Two Pairs – two sets of two cards of matching rank with one unmatched card (Example 1 – 4 of Clubs and Hearts, 8 Clubs and Spades and a fifth unmatched card). Where the player and dealer 1 both have two pairs, the hand with the highest pair is considered the winner. If both hands have matching top 1 pair, the higher of the two lower pairs is considered the winner. Where both pairs are matched, the hand with 1 the higher 'Kicker' (final unmatched card) is considered the winner.

* Pair - two cards of matching rank with three unmatched 1 card (Example – 6 of Clubs and Hearts and any three other cards that are not the six of Spades 1 or Diamonds and are not of matching rank). Where the player and the dealer hold a matching pair, the hand 1 with the highest Kicker card wins. If the Kicker also matches, the hand is decided by the second Kicker then 1 the third if the second Kickers also match.

* High Card – any five unmatched cards ranked as the highest card 1 (Example – 5 of Spades, 9 of Clubs, 7 of Clubs, 2 of Hearts and Ace of Diamonds would be 1 considered 'Ace High'). In the instance where both the dealer and player have hands of matching value by the above table 1 the hand is considered a push and the player's bets are returned.

Payouts

As with many other poker based casino games, there 1 is a qualification hand for the dealer to play. As such payouts vary depending on whether the dealer qualifies or 1 not. The dealer qualifies if their hand is Ace/King or better.

If the player loses all bets placed are lost. If 1 the player Folds they lose their Ante bet. If the player wins payouts are decided as follows;

* If the player 1 wins and the dealer does not qualify the Ante bet is paid out at 1 to 1 while the Call 1 bet pushes.

* If the player wins and the dealer does qualify the Ante bet is paid at 1 to 1 1 and the Call bets is paid according to the following payable;

Hand GameSys Payout* Payout Royal Flush 100 to 1 100 1 to 1 Straight Flush 50 to 1 50 to 1 Four of a Kind 26 to 1 20 to 1 1 Full House 8 to 1 7 to 1 Flush 5 to 1 5 to 1 Straight 4 to 1 4 1 to 1 Three of a Kind 3 to 1 3 to 1 Two Pairs 2 to 1 2 to 1 1 Pair 1 to 1 1 to 1 Ace/King 1 to 1 1 to 1 House Edge XXX 0.47%

* This payable 1 is only used on the 'Without House Edge' version of Oasis Poker. It should be noted that when playing the 1 Without House Edge games that the house take a 10% cut of any winnings at the end of the session.

Alternative 1 Discard Rules

Galewind software offer an alternative discard rule. Instead of being charged a full Ante bet for each card discarded 1 the charges for discarding different numbers of cards are as follows;

Number of cards discarded Cost 1 1xAnte 2 2xAnte 3 1 3xAnte 4 2xAnte 5 1xAnte

With this rule Galewind software also make an adjustment to the Call bet payable;

Hand Payout Royal 1 Flush 100 to 1 Straight Flush 50 to 1 Four of a Kind 20 to 1 Full House 6 to 1 1 Flush 5 to 1 Straight 4 to 1 Three of a Kind 3 to 1 Two Pairs 2 to 1 1 Pair 1 to 1 Ace/King 1 to 1 House Edge 0.55%

Jackpot Bet

The GameSys, GamesOS and Galewind software Oasis Poker 1 games also offer a side bet referred to simply as the 'Jackpot' bet. This side bet is optional but if 1 the player chooses to place the Jackpot bet it costs R\$1 and the results are based only on the player's final 1 hand (after any discard/replacements). The payouts for the Jackpot bet are provided below;

Hand Hand Probabilities GameSys* GamesOS Galewind Royal Flush 1 0.00000153908 1000
 1000 Jackpot Straight Flush 0.0000138517 500 500 10% of Jackpot Four of a Kind 0.00024 200
 200 500 1 Full House 0.001441 70 100 100 Flush 0.0019654 50 60 50 Straight 0.003924646 40

 218009.7 House Edge 3.05% 51.69% 31.50%-56.44%*

* This payable is 1 used for both the normal and 'Without House Edge' versions of Oasis Poker at GameSys casinos.

**The Galewind website lists the 1 theoretical minimum House Edge for the Jackpot bet as 24.04% which would equate to a Jackpot size of R\$135793.56. Our Jackpot 1 range is based on the reset value and the maximum value we've seen.

Calculating the House Edge and Break Even value 1 for the Jackpot Bet

It is possible calculate the House Edge and break even value for any jackpot value at the 1 Galewind game simply by using the Hand Probability figures.

To calculate the House Edge we multiply the Paytable values by the 1 probabilities, sum the results and subtract the remaining possibilities. So if we have a Jackpot value of 94000 the calculation 1 would be as follows;

$$94000 \times 0.00000153908 + 9400 \times 0.0000138517 + 500 \times 0.00024 + 100 \times 0.001441 + 50 \times 0.0019654 - (1 - (0.00000153908 + 0.0000138517 + 0.00024 + 0.001441 + 0.0019654))$$

$$0.14467352 + 0.13020598 + 0.12 + 0.1441 + 0.09827 - (1 - 0.00169639)$$

$$0.4309795 - 0.9998303609 = -0.3626$$

So the House 1 Edge for this Jackpot size is 36.26%

House Edge*

The House Edge of Oasis Poker using the standard payable and across the 1 full round of wagering (Ante bet, Discard fees and Call bet) and assuming that the player plays using the optimal 1 strategy discussed below is 0.47% and Net Entertainment casinos and 0.55% at Galewind casinos. If the player does not play 1 optimally this figure will rise.

The House Edge of the Jackpot bet is dependent on the payable the casino is using 1 and the size of the Jackpot, but our observations places the House Edge value between 31.50% and 56.44%.

For further information 1 regarding the house edge for both the main game and the Jackpot bet see Beating Bonuses (<http://beatingbonuses/oasis.htm>).

Optimal Strategy

The most important 1 aspect of correct strategy while playing Oasis Poker is not to play the Jackpot side bet unless it is over 1 the breakeven values listed above. As the Jackpot theoretically should never exceed the breakeven point this means the player should 1 never play the Jackpot bet. Even if the Jackpot value was above the breakeven value you should be aware that 1 this bet has an extremely high variance and it's highly unlikely that the regular player will ever hit the Jackpot, 1 meaning that realistically the regular player will be playing with a far higher house edge. The Optimal Strategy for Discard decisions 1 when playing Oasis Poker is relatively straight forward. Unlike Video Poker games the fee for replacing cards makes discarding a 1 poor choice except in a small number of situations, namely;

- When the player holds four cards of a Royal or 1 Straight Flush and their hand is not a Straight or a Flush. (Discard the one non-Royal/Straight Flush card)
- When the 1 player holds four cards of a Flush and does not have a Pair. (Discard the one non-Flush card)
- When the 1 player holds four cards to an Outside Straight* and does not have a Pair. (Discard the one non-Straight card)

This strategy 1 can be improved on with a little added complexity be discarding;

- When the player holds four to a Flush with 1 a 22 through 66 pair and the dealer's upcard is of higher rank than the pair. (Discard the one non-Flush 1 card)
- When the player holds four to an Outside Straight* with a 22 or 33 pair and the dealer's upcard 1 is of higher rank than any cards the player holds. (Discard the one non-Straight card)
- When the player holds four 1 to an Inside Straight* without a pair and the highest card of the

Straight is 10 or more with the 1 dealer's upcard of lower rank than any card in the Straight.

* An 'Outside' Straight is four cards that are numerically 1 adjacent meaning that two different cards would create a Straight (i.e. 6, 7, 8, 9). An 'Inside' Straight would be 1 four cards that could make a Straight with a gap in between meaning only one card rank could complete the 1 Straight (i.e. 3, 4, 6, 7).

The above is only the strategy for the Discard decision.

For the Fold/Call decision the decisions 1 are similar to Caribbean Stud Poker and as such are too complex for all but the most dedicated player to 1 memorise. A simplified version of this strategy would see the player Call with any hand of Ace/King/Jack/8/3 or better. This 1 results in a house edge 0.1% higher than the full optimum strategy. For full Optimum Strategy you can use our 1

Strategy Calculator;

Fairness Calculator

Below you can find a calculator to allow you to check the fairness of your wins/losses when playing 1 Oasis Poker.

*This fairness calculator will assume that you've been playing with the optimal strategy detailed above. If you have not 1 then the calculator will NOT return accurate results.

Winning Strategies

Offline

Hole Carding, Steering or Sorting

Unlike Blackjack the techniques used to gain an 1 advantage over the game of Caribbean Stud Poker in the offline environment are not nearly so widely discussed. Gaining information 1 on dealer's hole cards – be that via edge sorting, steering or hold carding – can produce a player advantage 1 as long as the information is used to alter the player's strategy. Even with information on up to two of 1 the dealer's hole cards and an optimised strategy the player still has a substantial disadvantage (nearly 2%) so you need 1 to have knowledge of at least 3 of the dealer's hole cards before this is a worthwhile game. With perfect 1 knowledge of all four dealer hole cards the strategy is trivial – Call, any winning hand or hand where the 1 dealer will not qualify – though it may be worth playing some losing hands to avoid unusual/suspicious folding decisions where 1 you hold a strong hand. With knowledge of only three hole cards or imperfect knowledge of four cards the strategy 1 is more complex.

The rarity of being able to obtain information on 3 or more of the dealer's hole cards and 1 the high skill level involved ensure that only the most diligent of professional players are ever likely to come across 1 this information and it should be emphasized that the risks involved in gaining less than perfect information are likely to 1 be substantial.

The best source of information on how best to play with additional information can be found in James Grosjean's 1 'Exhibit CAA: Beyond Counting'. The author provides the full and correct Optimal Strategy for Caribbean Stud Poker for each of 1 the different scenarios where additional information can be gathered. This book is widely considered the Bible for the professional player 1 and as such is not a worthwhile investment for anyone other than a full time professional Advantage Player (not to 1 mention it requires a professional reference to obtain).

Optimum Strategy and Sharing Hand Information

Offline the rules of Oasis Poker prohibit players 1 sharing information about their hands. Online it's certainly possible to share hand information if a multi-player tables could be found 1 without the casino being aware of it. However given the prohibited nature of this activity in the offline game we 1 would not like to comment on the ethics of engaging in such activities. As such the following information is for 1 use at the player's own risk – we do not encourage players to share information while playing Oasis Poker. We're 1 also not aware of any multi-player options in the online environment and include this information simply due to the easy 1 modification from Caribbean Stud Poker.

While the House Edge of Caribbean Stud Poker cannot be reduced enough to give a player 1 advantage without more hands being played than we are aware of being available online (at least 7 hands), given that 1 the Discard decision substantially reduces the overall House Edge of the game, it may be possible to gain a Player 1 Edge at Oasis Poker if enough additional hands are

known.

According to James Grosjean you would need to have information on 1 a full 7 hands and the dealer's up card (36 cards in total) alongside a playing strategy optimized to the 1 additional information to gain an edge of 2.374% over the house. 6 or less hands and the house retains the 1 edge. Even with complete information the strategy required to obtain this edge is far too complicated for human application. Grosjean 1 has developed a count system that couple be feasibly applied by a team of human players that achieves a player 1 advantage of 1.34%. We have neither the desire, the inclination, nor the permission to republish the details of this count 1 system, but interested parties should look to get hold of Grosjean's book 'Exhibit CAA: Beyond Counting'. It should be stated 1 that the opportunities for application of this system are extremely rare and very likely not worth the effort for anyone 1 but the most dedicated professional player. In the Optimal Strategy section of this article you will find our 'Strategy Calculator'. This 1 calculator has an option to generate the Optimum Strategy when additional cards are known. Simply check the 'Enter Additional Removed 1 Cards From Deck' option and AFTER you've entered your hand and the dealer's upcard, click on the cards that you 1 are aware of.

Online

There are several methods of legitimately gaining an advantage playing online Oasis Poker games. By and large these 1 involve the use of promotions, bonuses and comp point systems as the games by themselves – assuming the game is 1 functioning in a correct fashion and there are no errors in the paytable – will not provide any additional information 1 about the cards and shuffles after every hand.

It should be noted that online advantage play is not specific to Oasis 1 Poker and in recent years the wagering requirements for player's choosing to play any table game has inflated to the 1 point that Oasis Poker is now often a sub-optimal choice for the player. For more information on beating online casinos 1 see BeatingBonuses.
