An ace-high straight flush, commonly known as a royal flush, is the best possible hand in many variants of poker.

In 0 poker, players form sets of five playing cards, called hands, according to the rules of the game.[1] Each hand has 0 a rank, which is compared against the ranks of other hands participating in the showdown to decide who wins the 0 pot.[2] In high games, like Texas hold 'em and seven-card stud, the highest-ranking hands win. In low games, like razz, 0 the lowest-ranking hands win. In high-low split games, both the highest-ranking and lowest-ranking hands win, though different rules are used 0 to rank the high and low hands.[3][4]

Each hand belongs to a category determined by the patterns formed by its cards. 0 A hand in a higher-ranking category always ranks higher than a hand in a lower-ranking category. A hand is ranked 0 within its category using the ranks of its cards. Individual cards are ranked, from highest to lowest: A, K, Q, 0 J, 10, 9, 8, 7, 6, 5, 4, 3 and 2.[5] However, aces have the highest rank under ace-to-five high 0 or six-to-ace low rules, or under high rules as part of a five-high straight or straight flush.[6][7] Suits are not 0 ranked, so hands that differ by suit alone are of equal rank.[8]

There are nine categories of hand when using a 0 standard 52-card deck, except under ace-to-five low rules where straights, flushes and straight flushes are not recognized. An additional category, 0 five of a kind, exists when using one or more wild cards. The fewer hands a category contains, the higher 0 its rank.[9] There are $52! / (52 - 5)! = 311,875,200$ $\{\displaystyle \{\begin{matrix} \frac{52!}{(52-5)!} = 311{,}875{,}200 \end{matrix}\}$ ways to deal 0 five cards from the deck but only $52! / (52 - 5)! \cdot 5! = 2,598,960$ $\{\displaystyle 0 \{\begin{matrix} \frac{52!}{(52-5)! \cdot 5!} = 2{,}598{,}960 \end{matrix}\}$ distinct hands, because the order in which cards are dealt or arranged in a hand does not matter.[10] 0 Moreover, since hands differing only by suit are of equal rank, there are only 7,462 distinct hand ranks.[11]

Hand-ranking categories [0 edit]

* Only possible when using one or more wild

cards ** Category does not exist under ace-to-five low rules

Five of a kind [edit

]

Five of a kind, aces

Five of a kind is a hand that contains five cards of one rank, such as 3 3 3 3 3 ("five of a kind, threes"). It ranks above a straight flush but is only possible when using one or more wild cards, as there are only four cards of each rank in the deck.[6] Five of a kind, aces, A A A A Jkr, becomes possible when a joker is added to the deck as a bug, a form of wild card that may act as a fifth ace.[5] Other wild card rules allow jokers or other designated cards to represent any card in the deck, making it possible to form five of a kind of any rank.[12]

Each five

of a kind is ranked by the rank of its quintuplet. For example, Q Q Q Q Q ranks higher than 6 6 6 6 6.[6][13]

Straight flush [edit]

A jack-high straight flush

A

straight flush is a hand that contains five cards of sequential rank, all of the same suit, such as Q J 10 9 8 (a "queen-high straight flush").[4] It ranks below five of a kind and above four of a kind.[5] Under high rules, an ace can rank either high (as in A K Q J 10, an ace-high straight flush) or low (as in 5 4 3 2 A, a five-high straight flush), but cannot simultaneously rank both high and low (so Q K A 2 3 is an ace-high flush, but not a straight).[6][13] Under deuce-to-seven low rules, an ace always ranks high (so 5 4 3 2 A is an ace-high flush). Under ace-to-six low rules, an ace always ranks low (so A K Q J 10 is a king-high flush).[14] Under ace-to-five low rules, straight flushes are not possible (so 9 8 7 6 5 is a nine-high hand).[7]

Each straight flush is ranked by the rank of its

highest-ranking card. For example, 10 9 8 7 6 ranks higher than 8 7 6 5 4, which ranks higher than 6 5 4 3 2. Straight flush hands that differ by suit alone, such as 0 7 6 5 4 3 and 7 6 5 4 3, are of equal rank.[6][13]

An ace-high

straight flush, such as 0 A K Q J 10, is called a royal flush or royal straight flush and is the best possible hand in ace-high games when wild cards are not used.[5][15][16] A five-high straight flush, such as 5 4 3 2 A, is called a steel wheel and is both the best low hand and usually the best high hand of the showdown in ace-to-five high-low split games.[4]

Four of a kind [edit]

Four of a kind, fives

Four

of a kind, also known as quads, is a hand that contains four cards of one rank and one card of another rank (the kicker), such as 9 9 9 9 J ("four of a kind, nines"). It ranks below a straight flush and above a full house.[5]

Each four of a kind is ranked

first by the rank of its quadruplet, and then by the rank of its kicker. For example, K K K K 3 ranks higher than 7 7 7 7 Q, which ranks higher than 7 7 7 7 10. Four of a kind hands that differ by suit alone, such as 4 4 4 4 9 and 4 4 4 4 9, are of equal rank.[6][13]

Full house [edit]

A full house, sixes over

kings

A full house, also known as a full boat or a tight or a boat (and originally called a full hand), is a hand that contains three cards of one rank and two cards of another rank, such as 3 3 3 6 6 (a "full house, threes over sixes" or "threes full

of sixes" or 0 "threes full").[17][18] It ranks below four of a kind and above a flush.[5]

Each full house is ranked first by the 0 rank of its triplet, and then by the rank of its pair. For example, 8 8 8 7 7 ranks 0 higher than 4 4 4 9 9, which ranks higher than 4 4 4 5 5. Full house hands that 0 differ by suit alone, such as K K K J J and K K K J J, are of equal 0 rank.[6][13]

Flush [edit]

A jack-high

flush

A flush is a hand that contains five cards all of the same suit, not 0 all of sequential rank, such as K 10 7 6 4 (a "king-high flush" or a "king-ten-high flush").[19] It ranks 0 below a full house and above a straight.[5] Under ace-to-five low rules, flushes are not possible (so J 8 4 0 3 2 is a jack-high hand).[7]

Each flush

is ranked first by the rank of its highest-ranking card, then by the 0 rank of its second highest-ranking card, then by the rank of its third highest-ranking card, then by the rank of 0 its fourth highest-ranking card, and finally by the rank of its lowest-ranking card. For example, K J 9 6 4 0 ranks higher than Q J 7 6 5, which ranks higher than J 10 9 4 2, which ranks higher 0 than J 10 8 6 3, which ranks higher than J 10 8 4 3, which ranks higher than J 0 10 8 4 2. Flush hands that differ by suit alone, such as 10 8 7 6 5 and 10 0 8 7 6 5, are of equal rank.[6][13]

Straight [edit]

A ten-high straight

A straight is a hand that contains

five 0 cards of sequential rank, not all of the same suit, such as 7 6 5 4 3 (a "seven-high straight"). 0 It ranks below a flush and above three of a kind.[5] Under high rules, an ace can rank either high 0 (as in A K Q J 10, an ace-high straight) or low (as in 5 4 3 2 A, a 0 five-high straight), but cannot simultaneously rank both high and low (so Q K A 2 3 is an ace-high hand).[6][13] 0 Under deuce-to-seven low rules, an ace always ranks high (so 5 4 3 2 A is an ace-high hand). Under 0 ace-to-six low rules, an ace always ranks low (so A K Q J 10 is a king-high hand).[14] Under ace-to-five 0 low rules, straights are not possible (so 10 9 8 7 6 is a ten-high hand).[7]

Each straight is ranked by 0 the rank of its highest-ranking card. For example, J 10 9 8 7 ranks higher than 10 9 8 7 0 6, which ranks higher than 6 5 4 3

2. Straight hands that differ by suit alone, such as 9 0 8 7 6 5 and 9 8 7 6 5, are of equal rank.[6][13]

An ace-high straight, such as A K 0 Q J 10, is called

a Broadway straight,[20] while a five-high straight, such as 5 4 3 2 A, is 0 called a baby straight,[21] bicycle or wheel and is the best possible hand in ace-to-five low games (where it is 0 a high card hand, not a straight).[22][23]

Three of a kind [edit]

]

Three of a kind, queens

Three of a kind, 0 also known as trips or a set, is a hand that contains three cards of one rank and two cards 0 of two other ranks (the kickers), such as 2 2 2 K 6 ("three of a kind, twos" or "trip 0 twos" or a "set of twos"). It ranks below a straight and above two pair.[5]

Each three of a kind is 0 ranked first by the

rank of its triplet, then by the rank of its highest-ranking kicker, and finally by the 0 rank of its lowest-ranking kicker. For example, 6 6 6 Q 4 ranks higher than 3 3 3 K 2, 0 which ranks higher than 3 3 3 J 7, which ranks higher than 3 3 3 J

5. Three of a kind hands that differ by suit alone, such as 9 9 9 10 8 and 9 9 9 10 8, are of equal rank.[6][13]

In community card games, such as Texas hold 'em, three of a kind is called a set only when it comprises a pocket pair and a third card on the board.[24]

Two pair [edit]

Two pair, 0 jacks and threes

Two pair is a hand that

contains two cards of one rank, two cards of another rank and 0 one card of a third rank (the kicker), such as J J 4 4 9 ("two pair, jacks and fours" or "two pair, jacks over fours" or "jacks up").[17][25] It ranks below three of a kind and above one pair.[5]

Each 0 two pair is ranked first by the rank of its higher-ranking pair, then by the rank of its lower-ranking pair, 0 and finally by the rank of its kicker. For example, 10 10 2 2 K ranks higher than 5 5 0 4 4 10, which ranks higher than 5 5 3 3 Q, which ranks higher than 5 5 3 3 0 J. Two pair hands that differ by suit alone, such as K K 7 7 8 and K K 7 0 7 8, are of equal rank.[6][13]

One pair [edit]

]

One pair, tens

One pair, or simply a pair, is a hand 0 that contains two cards of one rank and three cards of three other ranks (the kickers), such as 4 4 0 K 10 5 ("one pair, fours" or a "pair of fours"). It ranks below two pair and above high card.[5]

Each 0 one pair is ranked first by the rank of its pair, then by the rank of its highest-ranking kicker, then 0 by the rank of its second highest-ranking kicker, and finally by the rank of its lowest-ranking kicker. For example, 9 0 9 Q J 5 ranks higher than 6 6 K 7 4, which ranks higher than 6 6 Q J 0 2, which ranks higher than 6 6 Q 8 7, which ranks higher than 6 6 Q 8 3. One-pair 0 hands that differ by suit alone, such as 8 8 10 6 5 and 8 8 10 6 5, are 0 of equal rank.[6][13]

High card [edit]

High card, king

High card, also known as no pair or

simply nothing, is a 0 hand that does not fall into any other category, such as K J 8 7 4 ("high card, king" or 0 "king-jack-high" or "king-high").[17][26] Note that under ace-to-five low rules, straights, flushes and straight flushes are not possible, so such hands 0 are instead high card hands.[7] It ranks below one pair.[5]

Each high card

hand is ranked first by the rank of 0 its highest-ranking card, then by the rank of its second highest-ranking card, then by the rank of its third highest-ranking 0 card, then by the rank of its fourth highest-ranking card, and finally by the rank of its lowest-ranking card. For 0 example, K 6 5 3 2 ranks higher than Q J 6 5 3, which ranks higher than Q 10 0 8 7 4, which ranks higher than Q 10 7 6 4, which ranks higher than Q 10 7 5 0 4, which ranks higher than Q 10 7 5 2. High card hands that differ by suit alone, such as 0 10 8 7 6 4 and 10 8 7 6 4, are of equal rank.[6][13]

Under deuce-to-seven low rules, a seven-five-high 0 hand, such as 7

5 4 3 2, is the best possible hand.[27] Under ace-to-six low rules, where aces have 0 the lowest rank, a six-four-high hand, such as 6 4 3 2 A, is the best possible

hand.[28] Under ace-to-five 0 low rules, where aces have the lowest rank and straights, flushes and straight flushes are not possible, a five-high hand, 0 such as 5 4 3 2 A or 5 4 3 2 A, commonly known as a bicycle or wheel, 0 is the best possible

hand.[7][22]

Os dinossauros eram de sangue quente como pássaros e mamíferos ou a frio, répteis? É uma das perguntas mais antigas da paleontologia. E recolher as respostas é importante porque ilumina o modo pelo qual os seres pré-históricos podem ter vivido para viverem bem com eles! Desafiando a ideia predominante de que todos eles eram lagartos lento, maçantes e turvos para regular black jack jogar temperatura corporal ao sol; pesquisas nas últimas três décadas revelaram como alguns dinossauros provavelmente pareciam pássaros com penas ou talvez capacidade black jack jogar gerar seu próprio calor. No entanto, é difícil encontrar evidências que inquestionavelmente mostrem como eram os metabolismos dos dinossauros. As pistas de ovos e ossos sugerem alguns dinossauro tinham sangue quente ou não estavam lá!

Um novo estudo publicado na revista Current Biology.

Na quarta-feira, três grandes grupos de dinossauros se adaptaram diferentemente às mudanças na temperatura e a capacidade para regular as variações da temperaturas do corpo no início dos tempos jurássica foi alterada há cerca 180 milhões anos.

Baseado black jack jogar fósseis de 1.000 espécies e informações paleoclimáticas, o novo estudo analisou a disseminação dos dinossauros através diferentes ambientes na Terra ao longo da era do dinossauro que começou há cerca 235 milhões anos atrás.

Dois dos três principais grupos - dinossauros terápedes comedores de carne, que incluíam T. rex e ornitíscuos herbívoro cujos membros notáveis incluíram Triceratops (Triceratop) ou Stegosaurus- se espalharam para viver black jack jogar clima mais frio durante os primeiros períodos do Jurássica; esses dinossauro podem evoluir na black jack jogar própria capacidade interna gerar calor corporal segundo a pesquisa ndice 129

Os terápedes e os ornitíscuos viviam black jack jogar uma ampla gama de paisagens térmica, nas respectivas histórias evolutivamente desenvolvidas por eles. As descobertas recentes mostraram que diferentes espécies até mesmo prosperaram no Ártico dando à luz ao longo do ano para viver lá durante todo esse tempo ”.

"Os animais de sangue quente são geralmente mais ativos, por exemplo: os a frio não constroem ninhos", disse o principal autor do estudo Dr. Alfio Alessandro Chiarenza Royal Society Newton International Fellow no departamento da University College London of Earth Science

Em contraste, os saurópodes imponentes e comedores de plantas se mantiveram black jack jogar regiões mais quentes do planeta com latitude inferior; a disponibilidade da folhagem rica não era o único fator que explicava isso. Os Saurópodees incluindo Brontosaurus ou Diplodocus - também pareciam prosperar nos ambientes árido-sacranhos (e praticaram "conservatismo climático prolongado", escreveram eles).

"Concilia bem com o que imaginamos sobre black jack jogar ecologia", disse Chiarenza. "Eles eram os maiores animais terrestres já viveram, provavelmente teriam superaquecido se fossem de sangue quente."

Além disso, acrescentou ele que a quantidade de matéria vegetal necessária para consumir se fossem sangue quente teria sido insustentável.

"(Esses animais) viviam black jack jogar rebanho e sabemos que cada um deles era o equivalente a 10 elefantes africanos. (Se fossem de sangue quente), eles simplesmente destruiriam vida vegetal, faz mais sentido como seres vivos para serem com menos força".

No entanto, Jasmina Wiemann cientista de pós-doutorado no Field Museum of Natural History black jack jogar Chicago disse que as descobertas deste estudo contrastaram com black jack jogar própria pesquisa. Seu trabalho 2024 sugeriu a possibilidade dos ornitísquios serem mais provavelmente sangue frio e os saurópodes terem um corpo quente (sauropo).

Ela questionou até que ponto a faixa biogeográfica de um dinossauro foi determinada por black jack jogar capacidade metabólica, black jack jogar oposição à outros fatores como comportamento estratégia do crescimento e preferências alimentares.

"Alguns animais com taxas de crescimento incrivelmente rápidas (ou seja, saurópodes), e por exigência metabolismos rápidos são aqui encontrados para ser sangue frio. enquanto outros animais que têm uma taxa muito lenta do desenvolvimento [por exemplo ceratopsianos] estão recuperado como endótermas", disse Wiemann."Essa discrepância precisara ter sido abordada".

Chiarenza disse que o modelo, desenvolvido por pesquisadores da UCL e Universidade de Vigo na Espanha. sugeriu os primeiros dinossauros eram mais reptilianos ou a sangue frio mas um período do aquecimento global resultante das atividades vulcânicas há 180 milhões anos atrás conhecido como Jenkyns Event pode ter sido uma causa para evolução dos processos capazes black jack jogar gerar calor internamente no corpo humano

"Neste momento, surgiram muitos novos grupos de dinossauros. A adoção da endotermia talvez resultado dessa crise ambiental pode ter permitido que os ropods (terópode) ou ornitísquios prosperassem black jack jogar ambientes mais frios permitindo-lhes ser altamente ativos para sustentar a atividade por períodos maiores; desenvolveremse rapidamente produzindo maior prole", disse ele num comunicado à imprensa [7]

Como com todas as pesquisas baseadas black jack jogar modelos, o estudo fez previsões fundamentadas na informação existente. Novos fósseis ou informações climáticas podem alterar essa imagem "Claro que se um saurópodes aparecesse no Ártico isso mudaria tudo", disse Chiarenza ndia

O paleontólogo Anthony Fiorillo, diretor executivo do Museu de História Natural e Ciência Novo México disse que o estudo foi "intrigante" e a primeira tentativa real para quantificar padrões amplos black jack jogar relação aos quais alguns já tínhamos pensado anteriormente. Fiorilo também é um membro sênior da Southern Methodist University (Universidade Metodista Sul), não estava envolvido com essa pesquisa".

"A modelagem deles ajuda a criar uma robustez para nossa compreensão biogeográfica dos dinossauros e black jack jogar fisiologia relacionada", disse ele.

"Este estudo fornece uma plataforma para que possamos testar ainda mais o quê achamos ser possível saber."
