recommend that instead of 8 reading good reviews, you try the app yourself now. You can do this completely free of charge. The developers of 8 PokerTracker give you a 30-day free usage period. During this time, you will be able to try the software for 8 free in Hold'em or Omaha games and get a closer look at how it works. If after the trial period 8 you decide that you don't like the software, you can simply not buy it. However, we can safely say that 8 you will be hard pressed to find a better HUD alternative on the market than PokerTracker4.

PokerTracker 4 - Why try 8 it?

If you want to make money playing

poker, you will have to accept that if you don't use the software, 8 your opponents will. A monthly subscription or a one-off fee is definitely worthwhile, especially if you are an active player. 8 Since it is almost impossible to predict all possible scenarios and outcomes in your head, and to read the actions 8 of all the players at the table at the same time, it's worth using a software program such as PokerTracker 8 4 to help you. Because you can try it for free.

What is PokerTracker 4? (PT4)

PokerTracker is a

computer program. It 8 requires Download, download (install), run and then use it immediately. PokerTracker 4 is a HUD and tracker in one.

HUD - 8 what is it?

HUD is an

acronym for Heads-Up Display. We do not have an exact translation equivalent in the

Lithuanian 8 language, so we often hear names such as "Hood", "Heads-Up Display", or we write the untranslated name at all. In 8 fact, HUD describes the video projection technology that creates the image in front of our eyes. In simpler terms, it 8 adds something to a normal image on some surface.

The best example of HUDs is HUD projections in new cars. A 8 special projector projects important data onto the windscreen of the car (e.g. the speed, the track you are driving on, 8 etc.). They are not there, but they are projected there. So, in fact, a HUD can also be called a 8 projection. In the case of PokerTracker 4, the HUD projects an image "on top" of what the poker software itself 8 is displaying. More precisely, it adds to the visible image.

In poker, the HUD acts as a tool that helps you 8 easily see a large amount of data about the game, all at once. It fills the regular application screen with 8 a wide range of relevant information (e.g. win probabilities, player action history, etc.). The HUD allows you to see your 8 odds in clear percentages and simplifies decision making. The data changes in real time, so you'll always have as much 8 information as possible at the time you need to make your move.

Tracker - what is it?

PokerTracker is not just a 8 HUD or visual aid. It also has great analytical potential. Analytical tools that track and analyse the progress of the 8 game are called trackers. With PokerTracker4 it is very easy to keep track of your past game statistics, to see 8 various indicators such as Flop Float %, Preflop Limp %, Pre Flop Raise % and others. By looking at this 8 data and analysing it, you can not only see how much you've won, but you can also find out what 8 you could do differently to win more, what mistakes you're making, where in the game you're getting pressured and so 8 on. New and experienced players alike will notice and appreciate how many features the app has. There are some disappointments 8 with some of the other HUD-type applications. Other HUDs or tracker-type applications offer only very superficial real-time assistance. PokerTracker 4 8 puts so many analytical tools on a plate, collects so much data and works so well that you really don't 8 need to buy any add-ons or plug-ins to improve your results.

Where can I play PokerTracker 4?

Perhaps the most interesting thing 8 that puzzles every player before choosing a poker software is where will it be available to play? As you probably 8 all know, an app needs to support a poker room and be compatible in order to take advantage of the 8 features it offers.

PokerTracker shines brightly here again, as both Windows and Mac users can play it pretty much anywhere. It's 8 true that the latter will enjoy a slightly narrower list of rooms, but the result is still very good.

PokerTracker 4 8 poker rooms for Windows PCs available 888Poker, PokerStars, Winamax, MPN and many more.

Full list:

Mac owners can connect to 888Poker, 8 PokerStars, Winamax, Merge, Full Tilt and several others. Full list:

We advise you to check that the software supports your favourite 8 poker room before you buy or invest in it. Otherwise, it's worth upgrading to one of the supported rooms, at 8 least for a trial period. Believe me, the benefits will be noticeable, so it pays to play wherever you find 8 it easier. Don't forget that you can register in some rooms at an exclusive PokerSchool discount. Don't miss out on 8 this opportunity!

How to get started?

This section will give you a brief overview of how to download, sign up and start 8 using the application. However, there is also a video guide to help beginners. You will need a little patience at 8 the beginning. Although it will only take you up to 10 minutes, certain steps require attention and patience. We've put 8 it all in one place for your convenience.

How do I download and install the PokerTracker 4 HUD?

Click on the link. 8 Download the application and run the downloaded file. The installation will start. Accept the terms and conditions, select the location 8 on your disk where you want the programme to be saved. Wait for the installation to finish. It usually takes 8 a few seconds. Start the app. Enter your registration code (if you have one) in the window that pops up, 8 or choose a 30-day free trial with Texas Hold'em or Omaha poker games. In the next window, the program will 8 ask you to subscribe to a PostgreSQL database. Please accept this, as this database/application is free and allows you to 8 store your hand history. The recording will be done automatically. Accept the PostgreSQL server settings (do not change anything) and 8 complete the installation (takes about a minute). Now you will need to create your own database using PostgreSQL. You can 8 have more than one of these databases, but one will be enough to start with. Give it a unique name 8 (if you wish). Do not change any other settings. Create the database and accept the offer to have PokerTracker HUD 8 link the data to PostgreSQL. In about half a minute everything should be connected. Proceed to the final configuration (select 8 the currency you are playing in, then select the rooms you will be playing in, and check that the hand 8 history settings in the poker room software match the PokerTracker 4 settings.

Finally, harmonise the layout and number of Seating. The 8 configuration of the individual poker rooms follows, but do it according to your needs. Basically, the programmers have prepared clear 8 guides for each room, which are easy to follow and to calibrate all settings. Finally, select the desired HUD view 8 (how the data appears on the screen). Next, in the app, click on Play Poker and Get Hands While Playing 8 in the top left.

That's it, let's play!

P.S. Please note that the HUD will only activate when you have played one 8 hand. Don't be alarmed.

PokerTracker 4 HUD and Tracker Benefits

We can easily find more than one reason to use it. For 8 those who are serious about online poker and for those who want the best possible results, this app can be 8 a step up or a breath of fresh air after an unsuccessful stretch. Once you get to know the tracker's 8 analytical tools properly, you will inevitably improve your results. Well, here are the biggest advantages of this app

Personalisation

It is most 8 often described as a flexible and very versatile tool for poker players. Its appearance and data presentation can be changed 8 to suit your needs. The HUD is fully customisable, which means that each player can change it as they see 8 fit. Reports and statistics are collected and generated automatically and the software is very user-friendly.

Supports a large number of poker 8 rooms

Not all HUDs or trackers are compatible with popular poker rooms. Some expensive tools work in isolated or little-known poker 8 rooms. PokerTracker does not have such problems. It is compatible with the world's most popular poker rooms for both Mac 8 and Windows operating systems.

"With the

8 appreciated by poker professionals. It is in the database that we can check our hands
and filter the information to 8 find gaps and close them. It's also where we can analyse
our opponents' play to find the best ways to 8 beat them, and understand what strategies
they are using that might be better than ours at the moment.
Finally, if you're 8 serious
about online poker, it's time to download a tracking/HUD software like PokerTracker4.
