Roulette is one of the most popular casino games in the UK and there are numerous different versions to help keep the action entertaining for players.

In one of these, Quantum Roulette, your winnings can be multiplied on any spin if you have bet on a single number.

Where to play Quantum Roulette in the UK

What is Quantum Roulette?

Quantum roulette is popular among regular roulette players because it offers players a chance of winning more if they bet on just one number.

The game uses the traditional European roulette wheel but there are five multipliers that can boost winnings on random numbers. These multipliers usually range from 50x to 500x, while a Quantum Boost adds an additional 50x. A Quantum Leap will randomly double or triple a multiplier.

Multipliers only apply to single numbers between 0 and 36, so punters will only win big if they back one. To compensate, non-multiplier straight-up numbers pay at 29/1 rather than 35/1.

Advantages to Quantum Roulette?

Multipliers

If you pick the correct number, there's the opportunity to have your win multiplied. This gives punters a reason to bet on individual numbers.

Unique game

The gameplay is different so it provides a refreshing change from traditional roulette. With even bigger wins possible, Quantum Roulette gives players an incentive to back straight-up numbers.

Lucky numbers

While there are no statistical advantages to choosing a lucky number, many players back them anyway and Quantum Roulette gives them the chance to see any winnings multiplied.

Is Quantum Roulette worth playing?

Quantum roulette is one of the most played variations of the popular casino game and makes for

an interesting option online. The odds for backing single numbers that aren't multipliers may not be as favourable but the chance to win big with a multiplier can offset this.
